Ph.D. in Computer Science at William & Mary,
Williamsburg, Virginia, USA

Dear Students,

I am an assistant professor in the department of **computer science** at **William & Mary**, one of the highest ranked public research universities in the United States. I am leading a research group focused on **computer security**. The areas of particular interest include: *hardware and architectural aspects of security*, *side-channel analysis*, *isolated execution environments* and *computer architecture*. I am currently looking for self-motivated and hard-working students who are interested in doing a cutting-edge research in **cybersecurity** and earning a Ph.D. in United States. William & Mary offers a competitive package for admitted students fully covering tuition, living expenses and student's stipend. In addition, students successful in research are supported from advisor's grants.

William & Mary (established in 1693) is the second oldest college in the US, located in beautiful Williamsburg, in the Commonwealth of Virginia. Today William & Mary remains one of the best universities in the nation (known as "Public Ivy"). William & Mary's faculty and students are known for their world-class research and active collaborations with leading reserches around the world.

If interested, please contact me via **email** with any questions.

Sincerely,

Dmitry Evtyushkin
Assistant Professor
Department of Computer Science
William & Mary
