

# CS301 - 2014

## Hall of Fame

### Outstanding Student Projects

The CS 301 Software Development class comes with a series of project assignments that lead to a working Android gaming app “AMaze” that allows the player to search for the exit of a maze. The four most outstanding student projects (in alphabetical order, not ranked):

- [CornMaze by Emily Parrish and Miranda Elliot](#)
- [ForrestMaze by Megan Tinkler](#)
- [SpyMaze by Alton Kim](#)
- [WhisperMaze by Kevin Ko and Daniel Park](#)

Each project has its own unique strengths, so the order does not reflect a ranking. They are all impressive, please see them all.
