

Get cs account if you don't have one already.

accounts.cs.wm.edu

You will use your WM password instead of CS password to login if you have made an account previously

Store large files in /scratch directory

- Is stored locally per machine
- It isn't backed up, but will no longer be wiped on a re-imaging
- Don't use usb to transfer files. Can't mount usb without sudo
- Use scp commands, or winSCP/filezilla for a GUI

SCP commands (2358-01 used for reference, can be 01-24 in 2358 or 2357)

First make a directory in /scratch with your username for ease of use.

- cd /scratch
- mkdir <username>

Local to remote

- scp -r <directory to move> <username>@isc2358-01.cs.wm.edu:/scratch/<username>

Remote to local

- scp -r <username>@isc2358-01.cs.wm.edu:/scratch/<username> <local destination>

Can potentially use -C to compress for faster transfer if large directories with Maya

- Haven't tested
