

```
void handleShowToast(final String s, final String s2) {  
    ThreadUtils.postToUiThread(new Runnable() {  
        public void run() {  
            Toast toast;  
            if (s2.equals("long")) {  
                toast = Toast.makeText((Context)GeckoApp.mAppContext,  
(CharSequence)s, 1);  
            }  
            else {  
                toast = Toast.makeText((Context)GeckoApp.mAppContext,  
(CharSequence)s, 0);  
            }  
            toast.show();  
        }  
    });  
}
```
